

Disable Patron Card Expiration Dates

As part of Patron Policies, you can set the number of days a patron's card is active. For some libraries this is used to track subscription renewals and so forth. But if you don't need your patron's cards to expire, you can Disable Card Expiration Dates.

In Preferences, under Management, click on Patrons, and look under the Patron Rules tab.

Check the box to Disable Card Expiration Dates.

When you set this preference, the program will ignore the Days Patron's Card is Active preference in Patron Policies. No longer will these users have to renew expired cards. This will help to make running your library more efficient and better meet the specific needs of your library.

Save your changes.
