Set up Extras Preferences: Axis 360

Alexandria is closely integrated with Baker & Taylor's eBook system Axis 360. When you choose the Baker & Taylor AXIS 360 solution, you will receive MARC records for your ebooks; import those records into Alexandria, and those ebooks now become available through the Alexandria Researcher just like your other resources.

Patrons perform a normal search, and the Axis 360 books appear.

Notice the Cover Art indicating this is an Axis 360 eBook.

By clicking on the cover art or link, the patron is taken to the details of this eBook in your AXIS 360 digital library. From there, the patron can check out the ebook, place it on hold if a copy is not available, or view other eBooks in your digital library.

Axis 360 will authenticate this patron with Alexandria to ensure they are in good standing with your library, and are allowed checkouts of this type according to Alexandria preferences and policies.

Preferences

To set this up, go to your **Preferences**, the Extras area, and select Axis 360 from the list on the left.

Check the box to Enable Axis 360.

You can enter the Vendor URL, but the important thing here is the Axis Code.

Axis 360 communicates with Alexandria via SIP2 (over the web port) to determine whether a patron's Status is valid and whether they are authorized to check out eBooks.

2

When Alexandria gets SIP2 messages from Axis 360, Alexandria uses this code to verify that it's from Axis 360, and that they will work together in accordance with registration, policies, and other settings. By default, this code is your Data Station's Serial Number.

Under the Contact tab, you may fill out contact information for your Axis 360 representative.

Save the preference.

You are now ready to use Axis 360 ebooks with Alexandria!

Additional Information

Be aware that Axis 360 eBooks will import as title records, and they do *not* need copies. By default they will be assigned to the eBook policy; you can change this later if needed.

Regardless of the Item Policy, the Maximum Loaned Items in the Patron Policy must be set to something above 0. Holds, reservations, and renewals are not available from within Alexandria for Axis 360 eBooks.

Also, the Axis 360 ebooks can not be directly viewed from Alexandria. Patrons will need to sign in to the Axis 360 site with their personal log-ins in order to view and check out the Axis 360 materials.

Patrons can use the Blio app to manage and read their Axis 360 ebooks. The Blio app is available for most eReader devices.
